INTRODUCTION

ABOUT OUR COMPANY

OVERVIEW

Established in June 2010, Texas Cancer Centre (TCC) was founded with the mission of providing specialized cancer treatment services. Recognizing the critical need for professional care to enhance patient survival, TCC's founders created an environment where both medical treatment and emotional support are prioritized. Cancer can drastically alter the lives of patients and their families, and at Texas Cancer Centre, the care team is committed to addressing not just the physical aspects of the disease, but also the intense emotional challenges that come with it.

While accurate diagnosis and access to effective treatment are essential, TCC also understands the powerful impact of compassion and kindness in patient care. Simple acts of kindness play a significant role in mitigating negative emotions, ultimately contributing to improved patient outcomes during their cancer journey. This holistic approach—combining expert medical care with empathy—leads to faster healing, reduced pain and anxiety, lower blood pressure, and shorter hospital stays.

Over the past 14 years, Texas Cancer Centre has provided care to nearly 30,000 new cancer patients, leveraging the expertise of skilled oncology professionals and state-of-the-art technologies. Through advanced chemotherapy and radiotherapy treatments, TCC ensures that patients receive world-class care in their fight against cancer.

OUR MISSION

To eliminate cancer, through exceptional programs that integrate patient care, research and prevention. Our mission also includes education for undergraduate and graduate students, trainees, professionals, employees and the public.

OUR VISION

To be the premier cancer center in Kenya, based on the excellence of our people, our research-driven patient care, and our science. We are Making Cancer History.
